MULTIOBJECTIVE OPTIMIZATION

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | An interval analysis-based multiobjective optimization of supersonic wing structures | Aerospace structures are usually operated in extreme and uncertain environment, and subject to the requirements of minimum weight, high performance and reliability. An interval-based game theory technique, coupled with interval-based nonlinear programming techniques is used for the optimum solution. The methodology is illustrated with two examples. The first one is a symmetric double wedge airfoil and the second one is a supersonic...
