A Contribution to the Psychology of Logic: Considered from a Physiological Standpoint (Classic Reprint)

By Augustus Désiré Waller

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Contribution to the Psychology of Logic: Considered From a Physiological Standpoint I. In ordinary language there is antithesis between the adjectives natural and artificial ; we say, for instance, that a product is natural or that it is artificial, implying thereby that natural and artificial are contrary qualities. But to the student of biological science there is no fundamental antithesis between such qualities, every possible event, from the simplest and most natural to the most complicated and artificial, is essentially natural, and sometimes phenomena that seem at first blush to be the most sophisticated and unnatural, are in his eyes most pregnant of natural meanings. The reflex adjustments of the central nervous system reach their highest degree of complication in Man, and if in the march of evolution, complication be in the direction of perfection, then we must recognise in the highly artificial products and customs and conventions of societies of men, the highest expression of natural laws of organic reaction. Formal logic, sometimes placed in express antithesis to natural logic, is ordinarily regarded...
