

Blogging the Moon : The Once and Future Moon Collection

Filesize: 1.96 MB

Reviews

A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where it basically altered me, change the way I believe.

Apogee Books, Canada, 2010. Paperback. Book Condition: New. First Edition. This title includes book & DVD. NASA has been in the news lately for reasons beyond the exciting discoveries of various and vast quantities of water on the Moon. Unfortunately, the long, drawn out repositioning of our national space program has brought the space community to loggerheads, leaving the future of the U.S. manned space program in jeopardy. The upheaval caused by fights over rocket designs and suppliers, and the 'Eenie, meenie, minie, moe' formula being used to select our new space direction, has placed the U.S. space program in peril. For over two decades Paul Spudis has had a front row seat to the U.S. national space program and has written extensively about space policy and space science. His opinions and insights recently found a home on the "Air and Space Magazine" blog, "The Once and Future Moon". Beginning with his reporting from India in October of 2008 (as the principal investigator of NASA's Mini-SAR, watching his radar being launched to the Moon aboard Chandrayaan-1), Paul's easy to read essays have followed and reported on the growing upheaval in the space community and the battle being waged for the ideological control of and funding for space exploration, and the resulting chaos. In keeping with his call for a strong U.S. human space program, Paul Spudis outlines and explains the importance of creating a sustainable space program through the use of the Moon's resources to create new capabilities to live and work in space and move humanity off planet. These essays and reader comments are compiled in the book. The bonus DVD includes a slideshow of over 30 years of Dr Spudis' pictures researching our Moon, as well as Dr Spudis' in-depth presentation about the Moon's resources. 328pp. Size: 8vo...
