

Software Architecture for Centralized Health Database

By Yasin, Affan / Shafiq, Hafiz Adnan

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Health R Us | Health R Us is a Journal handling system which is used by health care departments for storing and managing journal and journals. Electronic journal is used to accompany the patients from the first visit to the hospital including initial checkups, medications which include examination by doctor and all the medical data related to the patient. The system will be used by the hospital as well as care centers. The system will insure security by providing proper user privileges. The system also has a backward compatibility options that is we can also enter the information of the patient either adding manually or by migrating the data of patients from the previous system. The system will be able to fetch and send journals to other hospital and care center. Data and Network security is handled by the system through Secure File Transfer Protocol (SFTP). This software is used by hospitals or health care centers through PC's and thin client devices. The system will communicate with centralized server(s) through different communication channels. Each user has its own right/view to access the system. The main users of the system are doctors, nurses...
