Excerpt: . . . text, while another would use The Eclectic Physiology, 2 an elementary text. On the whole, however, the latter class of books as shown by published lists of texts, were in most common use. In a general way physiology has passed through stages similar to those of the other biological sciences. For example the religious aim was more or less common in the earlier years. The knowledge aim functioned considerably throughout the whole period, i. e. , knowledge as an end in itself. The other aim which controlled more or less was the so-called practical or hygienic aim. This, however, came rather late, not much emphasis being placed upon it until near the close of the century. The subject-matter which received the most attention throughout the whole period was of the anatomical sort. The authors of one of the earlier books state the following in...
