FastBook Publishing, 2012. Paperback. Condition: New. Language: English . Brand New Book. Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Archeologists have brought up evidence showing that the Great flood which is associated to Noah s Ark did happened! The strong proofs immediately contradict the various theories of scientists. The archeologists have mentioned that there is a very real possibility that during Noah s time period about 12,000 years ago massively iced-over lands collided with the sudden rising of the Mediterranean Sea, creating a wall of water which would have wiped out everything in its path with a force 200 times greater than that of Niagara Falls. Notably, it is these same archeologists who have discovered the famous wreckage of the Titanic in 1985. In fact, the researchers were in quest of the Amelia Earhart s plane when they detected proofs which led to the floods of Earth s living history. The archeologists various water expedition have allowed them to find an ancient shoreline 400 feet below the surface of the Black Sea. In addition to this, the archeologists have highlighted the carbon dating on shells which proved the existence of an event powerful enough to bury the shoreline around 5,000 B.C. - which is the time some say Noah lived.
