## Exploring the Landscape of the Mind: Understanding Human Thought and Behaviour (Hardback)

By Stephen S Clark

Xlibris Au, 2017. Hardback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. This book is based on the premise that humankind is, first and foremost, the outcome of the process of biological evolution. Recognition of this is fundamental to our understanding of who we are and how we behave. All living things have evolved the physical and mental attributes that promote their prospects for survival; they are good at doing the things that enable them to pass on their genes to succeeding generations, and we are no exception. Of course, through the development of culture, we have gained some freedom from our biological origins. Nevertheless, evolution has constructed the foundation upon which culture is built. The first part of the book, *Ourselves Interacting with the World*, presents an overview of the main capabilities that evolution has endowed us with and that enable us to interact with the environment in advantageous ways. This includes our senses, which act as windows on the world and also, of great importance, our emotions and ability to remember. Our ability to think is perhaps the crowning achievement of our evolutionary journey, and, of course, we must be able to act...
