Reviews

Completely essential read publication. It is really basic but excitement in the fifty percent of the book. You will not really feel monotony at anytime of your respective time (that's what catalogues are for about in the event you ask me).

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Lectures in the Training Schools for Kindergartners The introductory lecture is the one which first interested the Boston public in kindergarten education. The seven others are those which, for nine or ten successive years, I have addressed to the training classes for kindergartners in Boston and other cities. They unfold the idea which, though old as Plato and Aristotle, and set forth more or less practically from Comenius to Pestalozzi, was for the first time embodied in an adequate system by Froebel. The second lecture deals with the natural exemplification of this idea in the nursery, and is followed by two lectures on how the nursery opens up into the kindergarten through the proper use of language and conversation with children, and finally develops into equipoise the child's relations to his fellows, to nature, and to God. I have drawn many illustrations from my own psychological observations of child life, from which kindergartners may learn how to study.
