RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 58 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1917 Excerpt: . . . of tomato, cabbage, and flower plants in hothouse and cold-frames for sale to city people. Farm mechanics: Laying out complete drainage system with level; doing actual ditching; practice in land measurement; drawing plans for farm buildings; study and operation of gas engines, farm and spray machinery, automobiles; setting up machines; babbitting; concrete work; rope splicing and knotting; installation of weir for local farmers; making homemade machinery (for instance, this class made an Ames hulling and scarifying machine and a corrugated concrete roller). . . . surveying and planning systems for irrigation and for drainage for farmers (5 are in actual operation now). Farm management: Keeping records on farms--as homeproject each student keeps records and accounts on home farm for a period; accounts of near-by farms; making inventories; estimating depreciation; planning rotations; labor records, feeding records, field records, financial records; laying out map of county farm; study of actual farm conditions; they revise or rearrange some farm they are familiar with as one problem. Farm accounts: Because so few schools report this course, the data on practical exercises are not enlightening enough to warrant reproduction here. HELD TRIPS Field or observation trips are all but a universal constituent of courses in agriculture. Only exceptionally does a teacher report that these trips do not find a place in his courses. Furthermore, very few teachers fail to answer the question, which is additional evidence of the universality of the practice. The number of field trips reported varies widely. Although...
