Alinea Editrice, 2008. Book Condition: new. English and German Text. A cura di Dimitra Babalis. Firenze, 2008; paperback, pp. 72, cm 22x28. (Cities Design&Sustainability. 4). This Series seeks to present some new conceptions concerning the today's and future cities role in supporting sustainable communities. The Series will discuss the latest issues in planning, designing and building a better future achieving sustainability through urban and architecture design. CITIES, DESIGN&SUSTAINABILITY Series, is attempting to better understand some factors and principles which should stimulate everyone and condition a range of choices about the future of urban life. It will address issues on new ways of managing our cities and responding to the key current matters of urban change. It is focused on urban design which emphasizes sustainable use of resources as well as the value of sustainability and recognises the design as a process. It explores how high quality design is likely to have a positive impact and compatibility on the spatial, environmental, social and economic conditions of places and...
