Reviews

Simply no terms to explain. I am quite late in start reading this one, but better then never. Its been written in an remarkably easy way and is particularly merely soon after i finished reading this book where basically changed me, affect the way i really believe.
(Prof. Jedediah Kuhic DVM)

Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1862 Excerpt: .warm, light soil--juice is richer, and needs less boiling, giving a lighter colored syrup. The more vegetable matter in a given amount of juice, the darker the syrup, and the more difficulty in granulating. Agreed with Mr. Cory about letting cane stanl. Cane should be well matured. The vegetable matter then is turned to woody fibre, and is not left in sap. Green stalks give green tasting syrup. Less grape sugar in ripe cane. Must have warm soil in Michigan to mature the cane. O. N. Brainard, Lynn Co. Iowa--Best soil is good high hazle, sandy or gravelly soil, sloping to the south or south-east. Cane grown on dark soil, if cut and kept, makes much lighter syrup than if worked up at once. Dark rich land should not be manured, but if any is used, let it be coarse straw manure. Horse manure should not be used on any soil--it imparts acidity to the juice. Had seen syrup from soil thus manured almost as sour as lemon juice. Pi- manure gives a rank, bitter taste to syrup. Strongly manured land gives much greater amount of grape sugar and albumen, tending in a great measure, to prevent granulation--exhausted soils therefore better. Boiling prairie land good. Must plant thick on rich soil, so that stalks may grow small. Small stalks contain as much saccharine. matter as large ones, and are more easily worked. This closed the discussion for the first day, and the meeting adjourned to 9...
