

Dynamic Characterization Testing of Wind Turbines

Filesize: 8 MB

Reviews

The book is great and fantastic. it had been writtem extremely perfectly and valuable. I am very happy to let you know that here is the finest pdf i have read through within my own life and can be he very best book for actually.

(Miss Rossie Fay)

DYNAMIC CHARACTERIZATION TESTING OF WIND TURBINES

To download **Dynamic Characterization Testing of Wind Turbines** eBook, remember to refer to the hyperlink beneath and download the document or have access to other information which are have conjunction with DYNAMIC CHARACTERIZATION TESTING OF WIND TURBINES book.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 26 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The U. S. Department of Energy (DOE), in conjunction with the U. S. wind industry, is supporting the development and commercialization of utility-grade wind turbines. Under the Certification Program, the DOE, through the National Renewable Energy Laboratory (NREL) will assist the U. S. industry in obtaining American Association for Laboratory Accreditation (A2LA)-type certification for their class of wind turbine. As part of the Certification Program, NREL is conducting a suite of certification tests that are specified by the International Electro-technical Commission standards. One emerging certification requirement is to characterize the dynamic behavior of the wind turbines operation. Therefore, the purpose of the dynamic characterization tests is to document the wind turbines fundamental dynamic characteristics under critical operational modes and fault conditions in light of turbine design specifications. Some of the dynamic characteristics that we determine from testing include the conformation of fundamental structural vibration frequencies and the systems dynamic response to typical rated and extreme modes of operation. This paper discusses NRELs approach in designing and implementing a dynamic characterization test for commercial wind turbines. One important objective of the dynamic characterization test is to provide a Certification Agent with test data to show that the wind turbines mechanical equipment is operating within design vibration limits. For NRELs industry participant, the test results are an indication of the wind systems overall quality of mechanical operation that can be used to compare with established industry standards for a wind systems response under typical and extreme operating conditions. This item ships from La Vergne, TN. Paperback.
