Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm.

Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: .while the cost of the bottom does not vary more than from 13 to 17c per square foot, and that of the covering from 30 to 50c per square foot. After one or two preliminary trials, in which the capacity table on page 122 will be found helpful, the proper relation of H to D will be found, and by interpolation the proper H and D may be taken from the same tables. The amount of reinforcing in square inches per lineal foot of the shell is at a point h below the high water line given by $62.5hXy2DaHl6000 = \text{about } 5$, 16000 pounds being the allowable fibre stress on the steel. In the tables on pages 120 and 121 the second column gives the required reinforcement for values Dh up to 5000. The reinforcement per lineal foot should, however, never be reduced below Vi of...
