You will notice that the iron was deposited and the rings were then ground out of the deposit, directly from the cathodes. Of course that is done partly for the purpose of being able to test the iron as it comes in the deposited chunks, that is, without the effects of heat treatment; but I will add that I think Professor Burgess has not been able to melt the pure iron in sufficient quantities, and still keep it uncontaminated, to cast rings, and that is another one of the tremendous difficulties he is now working with. He has been using the heat of the electric furnace in order to supply the melting temperature, and to begin with he finds it necessary to...
