
Differential Geometric Methods in Mathematical Physics

By Heinz-Dietrich Doebner

Springer Aug 1985, 1985. Taschenbuch. Book Condition: Neu. 235x155x18 mm. This item is printed on demand - Print on Demand Titel. Neuware - The work of Steven M. Paneitz.- Indecomposable finite dimensional representations of the poincare group and associated fields.- The energy momentum mapping of the lagrange top.- On the momentum mapping in field theory.- An axiomatic characterization of the poincare-cartan form for second order variational problems.- Energy level distributions and chaos in quantum mechanics.- Quasi- -algebras and general weyl quantization.- Geometry of dynamical systems with time-dependent constraints and time-dependent hamiltonians: An approach toward quantization.- Regularity aspects of the quantized perturbative S-matrix in 4-dimensional space-time.- Curvature forms with singularities and non-integral characteristic classes.- Yang-mills aspects of poincaré gauge theories.- Supermanifolds and Berezin's new integral.- Spontaneous compactification and fermion chirality.- Off-shell extended supergravity in extended superspace.- Completely integrable systems of KdV-type related to isospectral periodic regular difference operators.- Non-linear techniques in two dimensional grassmannian Sigma models.- A geometrical obstruction to the existence of two totally umbilical complementary foliations in compact manifolds.- Einstein equations without killing vectors, non-linear sigma models and self-dual yang-mills theory.- Locality and uniformity in global elasticity.- Differential geometrical approach to the theory of amorphous solids.- The ising model...

Reviews

Extensive information for book fanatics. Better then never, though i am quite late in start reading this one. I am just delighted to tell you that this is basically the best pdf i actually have go through within my personal daily life and might be he greatest pdf for actually.

-- ***Guillermo Marquardt***

It is really an remarkable ebook that we actually have ever read through. I actually have study and i also am confident that i am going to gonna study once more yet again in the foreseeable future. It is extremely difficult to leave it before concluding, once you begin to read the book.
