

## Current Challenges in Stability Issues for Numerical Differential Equations : Cetraro, Italy 2011, Editors: Luca Dieci, Nicola Guglielmi

By Wolf-Jürgen Beyn

Springer International Publishing Dez 2013, 2013. Taschenbuch. Condition: Neu. Neuware - This volume addresses some of the research areas in the general field of stability studies for differential equations, with emphasis on issues of concern for numerical studies. Topics considered include: (i) the long time integration of Hamiltonian Ordinary DEs and highly oscillatory systems, (ii) connection between stochastic DEs and geometric integration using the Markov chain Monte Carlo method, (iii) computation of dynamic patterns in evolutionary partial DEs, (iv) decomposition of matrices depending on parameters and localization of singularities, and (v) uniform stability analysis for time dependent linear initial value problems of ODEs. The problems considered in this volume are of interest to people working on numerical as well as qualitative aspects of differential equations, and it will serve both as a reference and as an entry point into further research. 328 pp. Englisch.

### Reviews

*This publication is worth acquiring. It is actually full of knowledge and wisdom You are going to like the way the blogger publish this book.*  
-- **Prof. Stanley Hermiston**

*This composed publication is fantastic. I was able to comprehended everything using this composed e book. It is extremely difficult to leave it before concluding, once you begin to read the book.*  
-- **Miss Ova Kuhn IV**
