Reviews

It is one of the most popular books. I am quite late in starting to read this one, but better than never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Teaching Atlas of Nuclear Medicine Before the commencement of the war it was a gener ally accepted theory that a first-class pilot of an aeroplane could not be produced under a minimum of a year. Under present conditions the average young man can learn to handle an aeroplane and put it through all the known tricks Of looping, rolling, nose-dive spins, side-slips, etc., after a period of instruction of approximately no more than from twenty to thirty hours of actual ?ying.* That is a most extraordinary advance and it is in but slight part due to the improvements in engines and aeroplanes. Rather, it is almost entirely due to (1) the knowledge we now have as to how to execute aerial manoeuvres or aerobatics; (2) the improved methods of acquiring such knowledge, and (3) the confidence which we now know a pupil may have in attempting feats which, in the past, were looked upon as dangerous and as mere circus tricks. This book is an attempt to explain in simple form, and for the benefit of novices, the general rules calculated to turn a raw pupil into an expert pilot in the shortest possible time and with the greatest possible degree of safety to himself and his aereplane. Written during short periods of leave and at odd moments when off duty, I have not had the time to amplify it as fully as I should have liked; how ever, all it contains is based upon the hard lessons of prac tical experience and I feel that the rest to be learned can only be acquired in actual practice. If what I have written assists the pupil to approach his work in...
