We examine the correlation between fuel exports and GDP per capita growth, and poverty headcount ratio between 1960 and 2012. Since the discovery of crude oil in Nigeria the economy of Nigeria has improved, increasing the GDP through the sales of oil barrels abroad. The paper observes that the blessings from crude oil resource in Nigeria at large takes the form of increased government revenues, increased export earnings, the attendant improvement, opportunities and linkage effects in the economy. However the paper is majorly going to focus on the variables between the increased GDP and the increase poverty level. This paper is of the view that crude oil resource is more of curse than a blessing to the Nigerian economy. 16 pp. Englisch.
