Reviews

The very best book i at any time read. It generally does not price an excessive amount of. I discovered this publication from my dad and i recommended this book to understand.

COMPUTATIONAL MODELING OF OBJECTS REPRESENTED IN IMAGES : SECOND INTERNATIONAL SYMPOSIUM, COMPIMAGE 2010, BUFFALO, NY, USA, MAY 5-7, 2010. PROCEEDINGS

Springer Berlin Heidelberg Apr 2010, 2010. Taschenbuch. Condition: Neu. Neuware - It is indeed a great pleasure to welcome you to the proceedings of the International Symposium Computational Modeling of Objects Represented in Images. Fundamentals, Methods and Applications (CompIMAGE2010) held in Buffalo, NY, May 5-7, 2010. This was the second issue of CompIMAGE symposia, the first one being held in Coimbra, Portugal. The purpose of CompIMAGE 2010 was to provide a common forum for researchers, scientists, engineers, and practitioners around the world to present their latest research findings, ideas, developments, and applications in the area of computational modeling of objects represented in images. In particular, the symposium aimed to attract scientists who use various approaches such as finite element method, optimization methods, modal analysis, stochastic methods, principal components analysis, independent components analysis, distribution models, geometrical modeling, digital geometry, grammars, fuzzy logic, and others to solve problems that appear in a wide range of areas as diverse as medicine, robotics, defense, security, astronomy, materials science, and manufacturing. CompIMAGE 2010 was highly international. Its Program Committee members are renowned experts coming from 25 different countries. Submissions to the symposium came from 22 countries from Africa, Asia, Europe, North and South America. Overall, representatives of 32 countries contributed to the symposium in different capacities. 344 pp. Englisch.
