Not illustrated. 1908 Excerpt: . . . determined by the instrument at B the backsight on T. P. , is too large by the amount cd . Hence the H. I. of the instrument at B is too great, and consequently Report for 1897, pp. 315-320 and pp. 480-489. Report for 1853, pp. 94-96. Fig. 95. Leveling Across A River. the elevation of T. P. 2 too great by the amount cd . The mean of the two determinations would give the true elevation of T. P. if ab cd , but this occurs only when the two sights are taken under the same atmospheric conditions. Therefore it will be seen that the two sights must be taken simultaneously. In order to eliminate the errors of adjustment in the instrument it is necessary to use the same instrument at both ends of the line. To accomplish both of these results at once it is necessary to...
