AIDS Allergy and Rheumatology

By Jacqueline Akhavan

Humana Press. Paperback. Condition: New. 193 pages. Dimensions: 8.9in. x 5.9in. x 0.6in. The third edition of this popular book has been fully revised and updated and outlines the basic principles needed to understand the mechanism of explosions by chemical explosives. The history, theory and chemical types of explosives are introduced, providing the reader with information on the physical parameters of primary and secondary explosives. Thermodynamics, enthalpy, free energy and gas equations are covered together with examples of calculations, leading to the power and temperature of explosions. The new generation of explosive compositions called Insensitive High Explosives (IHE) have been introduced in this third edition with details of their properties. The effect explosives have on the environment has also been introduced together with relevant legislations. The new edition contains information on polyphosphazenes, high nitrogen molecules and details on new explosives such as LLM-105, CL-20, FOX-7, FOX-12, and DADNE. More detailed information is also provided on safety and the EMTAP tests. The book will aid the understanding of the theory of hot spots and its relationship to detonation and provides details on the manufacturing process for explosive molecules containing nitro, nitrate esters and nitramines. This concise, readable book is ideal for A...

Reviews

Basically no words and phrases to describe. It is really simplified but unexpected situations in the fifty percent of your book. I am delighted to let you know that here is the very best publication i have got go through within my very own lifestyle and might be he greatest publication for actually.

-- **Watson Kohler**

Completely among the finest book I have actually read through. It is probably the most remarkable book we have study. I discovered this book from my dad and i suggested this book to learn.
