CONGRATULATIONS, YOU ARE A SCIENCE NERD

Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.I am the creator of Pressman s Rock Trivia which sold over half million copies worldwide. My experience is in pop culture and music which has allowed me to know my market, so that I can provide the best concepts in cosmology and pop culture. This book is not aimed at the highly scientifically literate but rather individuals who seek and wish to understand the knowledge of the universe in an entertaining and creative way. I will use characters like Dr. Who and Superman to introduce theories. I will take complex theories like entanglement, time travel and quantum field theory while providing repetition and primary approaches, so that you can understand the concepts. In the book you will find blank sheets where you are encouraged to make notes or at least doodle. My simplified approaches come from my teaching background that includes more than twenty-five years with teaching in the Toronto District School Board. This book will open up a new world for you because I guarantee you will be able to pick up a book by Lawrence Krauss or John Gribbin or a magazine like Scientific American and understand the basic concepts of physics and cosmology. You will find that many of the theories will be repeated, reinforced and simplified (just like here) so that you will have no difficulty understanding the major components and ideas. Are you ready to be exposed to the world of Science Fiction and Comics that was inspired by real physics and cosmology? Get ready to rock and roll with book endorsements from physicists, science writers and educators. Please read each one. They include, Guy P.Harrison/science writer an author of Think, David...
