CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 58 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. U. S. -China economic ties have expanded substantially over the past three decades. Total U. S. -China trade rose from 2 billion in 1979 to 562 billion in 2013, and is estimated to have reached 593 billion in 2014. China is currently the United States second-largest trading partner, its third-largest export market, and its biggest source of imports. China is estimated to be a 350 billion market for U. S. firms (based on U. S. direct and indirect exports to China and sales by U. S. -invested firms in China). Many U. S. firms view participation in Chinas market as critical to staying globally competitive. General Motors (GM), for example, which has invested heavily in China, sold more cars in China than in the United States each year from 2010 to 2013. In addition, U. S. imports of low-cost goods from China greatly benefit U. S. consumers, and U. S. firms that use China as the final point of assembly for their products, or use Chinese-made inputs for production in the United States, are able to lower costs. China is the largest foreign holder of U. S. Treasury securities (nearly 1. 25 trillion as of October 2014). Chinas purchases of U. S. government debt help keep U. S. interest rates low. Despite growing commercial ties, the bilateral economic relationship has become increasingly complex and often fraught with tension. From the U. S. perspective, many trade tensions stem from Chinas incomplete transition to a free market economy. While China has significantly liberalized its economic and trade regimes over the past three decades, it continues to maintain (or has recently imposed) a number of state-directed policies that appear to distort trade and...
