HUMAN-POWERED TRANSPORT

[DOWNLOAD](#)

Alphascript Publishing Nov 2009, 2009. Taschenbuch. Book Condition: Neu. 220x150x6 mm. Neuware - Human-powered transport is the transport of person(s) and/or goods using human muscle power. Like animal-powered transport, human-powered transport has existed since time immemorial in the form of walking, running and swimming. Modern technology has allowed machines to enhance human-power. Although motorization has increased speed and load capacity, many forms of human-powered transport remain popular for reasons of lower cost, leisure, physical exercise and environmentalism. Human-powered transport is sometimes the only type available (especially in underdeveloped or inaccessible regions), and is considered an ideal form of sustainable transportation. 108 pp. Englisch.
