

Rocky Mountain Research Station Invasive Species Visionary White Paper

By J. Butler

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Dimensions: 11.0in. x 8.5in. x 0.1in. Invasive species represent one of the single greatest threats to natural ecosystems and the services they provide. Effectively addressing the invasive species problem requires management that is based on sound research. We provide an overview of recent and ongoing invasive species research conducted by Rocky Mountain Research Station scientists in the Intermountain West in order to familiarize managers with the Station and its products. We also provide several links to continuously updated web sites and a periodic newsletter that covers Rocky Mountain Research Stations invasive species research. This document contains an overview of invasive species research efforts by the Rocky Mountain Research Station (RMRS) to familiarize managers with the Station and its products. Invasive plant, pathogen, invertebrate, and vertebrate species are among the greatest threats to forest, range, aquatic, and urban forest ecosystem health. Exotic species invasions in the United States cost an estimated 120 billion annually in lost revenues and mitigation. Expanding global trade increases both the introductions of invasive species and the costs associated with preventing introductions and managing new infestations. To address these threats, a...
