

Catalogue of Stars Within Two Degrees of the North Pole: Deduced from Photographic Measures Made at Vassar College Observatory (Classic Reprint) (Paperback)

Filesize: 4.99 MB

Reviews

This written book is great. I am quite late in start reading this one, but better then never. You will not really feel monotony at at any moment of your time (that's what catalogues are for about when you check with me).

(Abe Reichel DDS)

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Catalogue of Stars Within Two Degrees of the North Pole: Deduced From Photographic Measures Made at Vassar College Observatory The investigation involved in this memoir is an extension of the stellar catalogue presented in Publication No. 1 of the Vassar College Observatory. Publication No. 1 gives a catalogue of stars within one degree of the north pole. Publication No. 2 extends the catalogue to two degrees from the pole. Both catalogues are based upon photographs taken by Professor Donner of Helsingfors, Finland, and secured through the courtesy of Professor Jacoby of Columbia University. The direction of the measuring and reduction of the plates has been in the hands of Caroline E. Furness, Ph. D., assistant in the observatory. The observations for magnitude, photographic and visual, made after the manner described in the text, were carried on by the director. The computing corps has consisted mainly of graduates of Vassar College, of whom Miss M. E. Tarbox and Miss B. Tompkins have rendered especial service. The major part of the expense of the reduction has been met by a grant from the Carnegie Institution of Washington, D. C. Mary W. Whitney, Director of Observatory. Vassar college, June, 1905. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
