Brand New Book ***** Print on Demand *****.Not long ago, it was assumed that coronary heart disease mainly--or only--affected men. Now that CHD is recognized as a leading killer of women as well as men, numerous research studies have been made of its diverse presentations in women, causal factors, and possibilities for prevention and treatment. Chapters identify and analyze multiple intersections of social, biological, and psychological factors in affecting women's heart health, from the social dimensions of depression to genetic/environmental interactions to the demands of balancing work and family. Gender observations on basic physiological stress mechanisms in men and women. Sleep as a means of recovery and restitution in women. LifeSkills training: benefiting both genders, for different reasons. Gender considerations in psychosocial-behavioral interventions for coronary heart disease. It is emphasized in the chapters on psychosocial interventions along with other tangible and conceptual suggestions...
