

Ball Lightning Physics: No Plasma and Electricity Are Required (Paperback)

Filesize: 1.73 MB

Reviews

A must buy book if you need to adding benefit. It really is writter in easy terms instead of difficult to understand. I found out this ebook from my dad and i advised this publication to find out.
(Prof. Elton Gibson I)

BALL LIGHTNING PHYSICS: NO PLASMA AND ELECTRICITY ARE REQUIRED (PAPERBACK)**DOWNLOAD**

To download **Ball Lightning Physics: No Plasma and Electricity Are Required (Paperback)** PDF, please access the button beneath and save the document or gain access to other information that are have conjunction with BALL LIGHTNING PHYSICS: NO PLASMA AND ELECTRICITY ARE REQUIRED (PAPERBACK) book.

Createspace, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. It is generally recognized that the Ball Lightning (BL) is a shame of modern theoretical and experimental physics. At present above 2000 publications are known, above 200 various theories are suggested. But nobody can explain even approximately the intriguing and puzzling behavior of BLs. As is market in last book of BL, all theories have one thing in common - none work. The explanation of the BL phenomenon is deadlocked. There is an opinion that the contemporary knowledge about Nature is insufficient to explain the BL. We are trying to show that the knowledge is sufficient but its usage leaves much to be desired. BL problem is an example when a common sense overcomes the conclusion derived from generally accepted physical laws in spite of the fact that the conclusion is confirmed by the phenomenon observed by thousands of eyewitnesses. In 2002 we put forward the hypothesis that neither plasma nor other material particles form BL. In is immutable fact that BL radiates the light. We concluded that BL consists of the light only. But it is known that the light is an electromagnetic wave that propagates in a straight line in a homogeneous optical medium at very great speed. We assumed that the light can propagate along curve closed trajectories that are embedded in a sphere of several centimeters radius. But what is the reason that forces the light to propagate in such a way. Our answer - the reason is the light itself. The light can be self-confined. Seemingly, this is an oxymoron like dry water or hot ice. But the contemporary knowledge allows an existence of the self-confined light. This is an optical space soliton that can be considered...
