SCHEDULING AND ROUTING OF VEHICLES

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Fleet size Optimization | This work addresses the problem of finding the minimum number of vehicles required to service weekly a set of customers subject to time windows. The specific structure of the problem requires that a full loaded vehicle serve only one customer each time it leaves the depot. As a consequence, all feasible schedules involve the same total distance traveled. The fleet is homogeneous and is located in a common...
