We all want to know when a person is being honest or not; relationships, businesses and friendships with trust depend on it. There are specific rules, far beyond what the detection of a lie could show, that tend to be used in courts to reveal the true nature of the human mind. These principles are revealed in this book as well, to describe precisely how the human mind works to conceal a lie or even a crime. The principles apply to all human beings because they are related to the process of thinking, feeling and acting. Criminal Psychology depends on this knowledge, as well as anyone else that wishes to know truth. Only with such truth can happiness without betrayal be possible. With the intention of providing the complete structure related to thought and moral, this book provides strategies and techniques that allow, not only knowing the intentions of a person, but also predicting his behaviors in the future and the level of ethic within such acts. The Art of Judging is here presented with all the paradigms involving the human mind so that the common citizen may apply it in daily life to know people behind their social masks and words, because intentions are more important than words!
