Immunochemistry methods

By Krstic, Tamara

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Antigen and antibody production. Immunological tests | Book Immunochemistry methods consists of three main chapters (Introduction, Production of antigens and antibodies and Immunological tests). Each of three chapters has corresponding sub-continent. Introduction provides a brief, basic overview of the main components of the immune system. It gives a good basis for the display of techniques used in immunohistochemistry. Chapter Production of antigens and antibodies describes the sources of these components and methods for their preparation and purification, to very details. Chapter Immunological tests gives a comprehensive illustration of reactions for identification and quantification of antigens. It also gives a brief overview of cellular immunological techniques and tests of complement. Its own experience in the field, allows author to present these materials in comprehensive way. Theoretical definitions, descriptions of techniques and practical examples are of great importance for obtaining knowledge about the principles of immunohistochemistry. All this is illustrated by a large number of attractive and meaningful pictures, which allows the reader to visually experience all that is described. | Format: Paperback | Language/Sprache: english | 140 pp.

Reviews

This publication is really gripping and exciting. It really is basic but unexpected situations in the 50 % in the book. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- **Prof. Salvador Lynch**

Unquestionably, this is the finest function by any article writer. I have read and that i am confident that i am going to likely to read yet again once again later on. Your daily life period will probably be transform when you comprehensive reading this article book.
