Pages Number: 219 Publisher: East China University of Technology Press Pub. Date :2008-10. Introduction to Nanomaterials to nano-materials Preparation. Structure and Properties and applications of the main line. from the zero-dimensional structure of cells to nano-assembly system. a more systematic introduction to the basics of nano-materials and the latest scientific and technological achievements. The book is divided into ten chapters. the first chapter introduces the basic concepts of nano-materials; second chapter describes the basic characteristics of nano-materials; Chapter III to Chapter introduced the zero-dimensional. one-dimensional and two-dimensional structural elements of the preparation . structural characteristics and properties and applications; Chapter 6 describes the nano-glass. nano-ceramic. nano metal and nano-polymer such as three-dimensional structure of the preparation. structure and performance characteristics and applications; seventh chapter briefly describes several major 3D nanocomposites; the eighth chapter of the manual assembly of nanostructures and molecular self-assembly. and molecular devices and molecular machine type and operating principle; Chapter IX describes the measurement techniques and nanomaterials characterization methods. the tenth chapter Application of nano-materials and development prospects. Contents: Chapter 1 Introduction Section I of the basic...
