

Bulletin - Montana State College, Agricultural Experiment Station Volume 103-120

Filesize: 9.01 MB

Reviews

An incredibly awesome publication with perfect and lucid reasons. It can be written in simple phrases and not confusing. I am just delighted to let you know that this is actually the very best publication I actually have studied during my very own lifestyle and could be the best publication for actually.

(Paula Gutkowski)

All communications to the Experiment Station should be addressed to THE MONTANA EXPERIMENT STATION, Bozeman Montana Helena Great Falls Missoula Billings Bozeman Helena Dillon Butte Libbv Bozeman Bozeman Bozeman Bozeman Montana State Grain Laboratory ruary, March, and April were the months when the greatest number of samples were received both years. This report presents a statement of the work carried on by the Montana Grain Laboratory, located at the Montana Agricultural Experiment Station, Liozeman, during the year ending September 30, 191 o. This laboratory was established by an act of the State Legislature of 193. Its purpose is to study the milling and baking qualities of Montana wheats and to make germination and purity determinations of seed samples sent in by growers and dealers. THE YEAR S WORK The year s activities in this laboratory may be briefly summar ized as follows: 1. Testing and reporting on 2,306 samples for germination and purity, examining 118 samples to determine the grade and dockage, and making tests of 116 additional samples in connection with experimental study, ---a total of 2,570 samples handled during the year. The results of the germination and purity tests are given in detail in the later pages of this report. 2. Making 160 laboratory and field tests to find out the percentage of germination of hard seeds in legumes. The general practice is to assume that a certain percentage of such seeds (seeds with hard coats which will not germinate...
