

A Model-based Analysis of First-Generation Service Discovery Systems

By U. S. Department Of Commerce

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 118 pages. Dimensions: 11.0in. x 8.5in. x 0.3in. Information technology is undergoing a paradigm shift from desktop computing, where isolated workstations connect to shared servers across a network, to pervasive computing, where myriad portable, embedded, and networked information appliances continuously reconfigure themselves individually and collectively to support the information requirements of mobile workers and work teams. This shift will not occur overnight, nor will it be achieved without solving a range of new technical and social problems. Still, this inexorable change should yield many economic opportunities for the global information technology industry, and for the increasing swath of businesses that depend on information. This item ships from La Vergne, TN. Paperback.
