(a) Means shall be provided whereby the operator (whether motorman or elevator attendant) can prevent the starting of the equipment by unauthorized persons while he is absent from his post. Removable reverse levers or controller handles and locked doors to the operators cab, are among the most effective means. (b) The car control lever of passenger elevators shall be located so that the operator can readily face the principal car opening. (c) Provision shall be made in all a. c. elevator circuits to guard against changing direction of elevator due to the unintentional reversal of any phase of the circuit. TELEPHONE APPARATUS AND SIGNALING DEVICES. Order 769. --Guarding and Grounding. (a) Where telephone apparatus which must be handled by persons is permanently connected to overhead...

Reviews

This publication will be worth purchasing. This is for all those who statte there was not a worthy of reading through. I discovered this publication from my dad and i suggested this pdf to find out.

-- **Macey Cummerata**

This pdf is wonderful. It really is writter in simple terms instead of hard to understand. Its been developed in an exceedingly simple way and it is just after i finished reading this ebook in which in fact modified me, alter the way in my opinion.
