Createspace Independent Publishing Platform, United States, 2012. Paperback. Book Condition: New. 228 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Large numbers of pets die or become sick before their time despite the best efforts of veterinarians. I believe that much of this has to do with hormonal imbalances that deregulate the immune system of animals, undermining their natural protection against illness and thus robbing them of good health and normal longevity. Many end of the line animals have been referred to me during my clinical practice. Their owners had been told that euthanasia was the only humane option left for their beloved pets. In some very advanced cases, those with permanent, irreversible damage having been caused, this has been true; but in a vast majority of situations there is hope for restoring these animals to good health because now there is a solution. Many years ago as a young practitioner, I tried to figure out why so many patients were getting sick and not responding to standard treatments. My clinical work led me to a major hormone base immune system disturbance that begins in the adrenal glands and goes on to create a ripple effect throughout the body's physiology. The conditions I was successfully treating were ranging from common allergies to reproductive failure to catastrophic autoimmune diseases and cancer. Through my clinical work over the years identifying and correcting this endocrine system based problem, I have developed a successful diagnostic and treatment protocol that has helped thousands of patients not only in my own clinic but also in many other veterinary clinics throughout the world.
