

Partial Differential Equations and the Calculus of Variations: Essays in Honor of Ennio de Giorgi

Filesize: 5.04 MB

Reviews

It is in a single of the best pdf. Better then never, though i am quite late in start reading this one. I realized this ebook from my dad and i encouraged this publication to understand.

PARTIAL DIFFERENTIAL EQUATIONS AND THE CALCULUS OF VARIATIONS: ESSAYS IN HONOR OF ENNIO DE GIORGI

DOWNLOAD

Birkhauser. Paperback. Condition: New. 1019 pages. Dimensions: 9.0in. x 6.0in. x 1.2in. These volumes, dedicated to the great Italian mathematician Ennio De Giorgi on the occasion of his sixtieth birthday, present a series of essays by an international group of leading mathematicians. De Giorgi is well known for his fundamental results on the regularity of solutions of elliptic partial differential equations, minimal surfaces, and the asymptotic analysis of variational problems. These essays give an overview of recent developments in mathematical analysis, particularly in partial differential equations and the calculus of variations, which clearly shows the influence of De Giorgi's work. The collection is completed with an interview with Ennio De Giorgi himself about the role of mathematics in the sciences and in society. Volume I
 Table of Contents Preface A Conversation with Ennio de Giorgi An improvement of Cartan's test for ordinarity A mathematical contribution to Gibbs analysis of fluid phases in equilibrium The epi-continuation method for minimization problems. Relation with the degree theory of F. Browder for maximal monotone operators Discretization of evolution variational inequalities Homogenization for non-linear elliptic equations with random highly oscillatory coefficients L^∞ and L^1 variations on a theme of Gamma-convergence Asymptotics for elliptic equations involving critical growth Asymptotic behaviour for Dirichlet problems in domains bounded by thin layers Fundamental interior estimates for a class of second order elliptic operators Gamma-Convergence of integral functionals defined on vector-valued functions Limits of obstacle problems for the area functional Some remarks on the well-posedness of the Cauchy problem in Gevrey spaces Approximating measures and rectifiable curves A non-uniqueness result for the operators with principal part $\partial^2_t + \partial^2_x$ A note on duality and the calculus of variations Some results on periodic solutions of Hamilton-Jacobi equations in Hilbert spaces Generalized solutions to ordinary differential equations with...
