

High Performance Computing for Computational Science - Vecpar 2002: 5th International Conference, Porto, Portugal, June 26-28, 2002. Selected Papers and Invited Talks

By -

Springer. Paperback. Book Condition: New. Paperback. 738 pages. Dimensions: 9.2in. x 5.9in. x 1.1in. The 5th edition of the VECPAR series of conferences marked a change of the conference title. The full conference title now reads VECPAR 2002 5th International Conference on High Performance Computing for Computational Science. This reflects more accurately what has been the main emphasis of the conference since its early days in 1993 the use of computers for solving problems in science and engineering. The present postconference book includes the best papers and invited talks presented during the three days of the conference, held at the Faculty of Engineering of the University of Porto (Portugal), June 26-28 2002. The book is organized into 8 chapters, which as a whole appeal to a wide research community, from those involved in the engineering applications to those interested in the actual details of the hardware or software implementation, in line with what, in these days, tends to be considered as Computational Science and Engineering (CSE). The book comprises a total of 49 papers, with a prominent position reserved for the four invited talks and the two first prizes of the best student paper competition. This item ships...

Reviews

This is basically the very best book we have gone through until now. I have got read and I also am confident that I am going to go back and study once again in the future. I am just very happy to inform you that this is basically the very best ebook we have read inside my own life and might be the very best publication for at any time.

-- **Angus Hickie**

An extremely wonderful ebook with lucid and perfect explanations. I was able to comprehend almost everything using this composed publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
