Brand New Book ***** Print on Demand *****.Excerpt from Unit Area Control: Its Development and Application One last caution in the application of unit area control. Most timber types are relatively uniform throughout their range. within that range, however, there will be local differences in such things as climate, subordinate vegetation, and rodent population. A fundamental principle of unit area control is that treatments must fit stand needs or requirements. Therefore you must consider your own stand conditions when adopting or adapting silvicultural treatments that are successful elsewhere.
