EVOLUTION OF FLAGELLIN PERCEPTION IN ARABIDOPSIS THALIANA AND ITS RELATIVES

Cuvillier Verlag Aug 2010, 2010. Taschenbuch. Condition: Neu. Neuware - Plants are constantly challenged by microbes which try to gain fitness benefits at the cost of their host. Microbes which may putatively cause disease are therefore detected by plant receptors that bind pathogen-associated molecular patterns (PAMPs). The peptide flg22 resembles the most conserved part of the N-terminus of bacterial flagellin and is perceived as a PAMP by the pattern recognition receptors (PRR) FLAGELLIN-SENSING 2 (FLS2) in all higher plant species....

Reviews

This is the finest publication we have read through right up until now. Better then never, though i am quite late in start reading this one. Its been written in an remarkably easy way in fact it is only after i finished reading through this book by which basically altered me, affect the way i think.

-- **Dr. Gabriella Hayes**

This publication will never be effortless to get started on reading through but very entertaining to read through. It normally is not going to expense too much. I discovered this publication from my dad and i encouraged this book to find out.
