

A Textbook in General Science and the Economics of Daily Life (Classic Reprint)

By Herbert Brownell

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Textbook in General Science and the Economics of Daily Life A science, as the term is usually employed, implies a grouping of the facts and phenomena of some one field of human knowledge according to certain general statements known as theories and laws. Botany, for instance, is a classification of man's knowledge of plants, and of the conditions for their growth. It makes possible the study of plants in groups rather than one by one. But in General Science as a high school subject selections of topics for study are made from any and all of the secondary school sciences. These topics are studied for the general purpose of giving scientific explanations to whatever affects daily life in so far as they lend themselves readily to elementary scientific discussions. Some theory is given as needed in these explanations, but there is little or no regard to whether the facts and explanations have to do with any one science or another. Sufficient experimental phenomena are to be provided in laboratory exercises and classroom demonstrations....
