HP plans to replace all of their high end, precision architecture systems with Itanium systems within the next two years. According to IDC, HP continues to maintain its long-standing No. 1 position in the rapidly growing Linux server market across all server platforms with 31.7 percent customer revenue share worldwide. This book is divided into two parts. Part 1, Linux System Administration, begins with extensive coverage of booting HP Itanium-based systems. This is crucial as these systems can run Linux, HP-UX, and Windows Server 2003 simultaneously, and because the boot process is substantially different than on previous systems. 332 pp. Englisch.
