

The application of confocal microscopy to porphyrin photosensitisers

Filesize: 4.45 MB

Reviews

Complete manual! Its such a great study. It really is writter in straightforward phrases rather than hard to understand. You are going to like the way the article writer create this publication.

THE APPLICATION OF CONFOCAL MICROSCOPY TO PORPHYRIN PHOTOSENSITISERS

[DOWNLOAD PDF](#)

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Fibre-optic confocal microscopy and fluorescence lifetime imaging applications | High spatial resolution and image contrast are often competing demands in micro-spectroscopy. New imaging modalities are constantly being sought, particularly in the biosciences, due to the complexity of intracellular environments. This work describes the application of novel confocal imaging techniques to the identification of intracellular porphyrin species responsible for the efficacy of a treatment for cancer termed photodynamic therapy (PDT). Microscopic visualisation of the intracellular porphyrin distributions is accomplished using an innovative, fibre-optic confocal fluorescence imaging microscope whose development and performance are outlined. In addition to conventional confocal techniques, a new imaging modality that uses time-correlated, single photon counting is also described. Termed fluorescence lifetime imaging (FLIM), it provides image contrast on the basis of luminescence lifetime facilitating the identification of porphyrin species in complex cellular micro-environments. | Format: Paperback | Language/Sprache: english | 404 gr | 220x150x15 mm | 292 pp.
