INFRARED HOLOGRAPHY FOR OPTICAL COMMUNICATIONS : TECHNIQUES, MATERIALS AND DEVICES

Springer Berlin Heidelberg Okt 2002, 2002. Buch. Condition: Neu. Neuware - The aim of this book is to exploit the advantages of holographic technology, namely the high storage capacity and fast access times, in order to implement optical devices for infrared fiber communication applications. The covered methods range from two-lambda to gated recording techniques, all of which can be applied to a variety of materials such as photorefractive crystals and photopolymers. Both techniques and materials are strictly related to the...

Reviews

Basically no phrases to clarify. It really is rally fascinating through reading time. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Anabel Zemlak**

The book is fantastic and great. I have got read through and i am confident that i will planning to read yet again once again in the foreseeable future. I found out this book from my dad and i recommended this publication to discover.
