Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Report on the Progress of Surgery Made to the St. Louis Medical Society In venturing upon the subject of amputations we have, perhaps, nothing to Offer that is new, or not generally known to the profession, and shall therefore only notice briefly the discussion of some operations which are not definitely established in practice. In reviewing the history of this special branch of surgery, we can claim but little advance for it within the past few years. Indeed the Light of knowledge in regard to this once most formidable and dreaded Of operations, which burst upon it with the introduction of the ligature by Ambrose Pare, in 1560, seemed to be almost perfected by that of the tourniquet by Morrel in 1674. And yet there is probably no operation in surgery that has emerged from such a veil of darkness and dread, as that of amputation. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
