

Aerospace Robotics

By Jerzy Sasiadek

Springer-Verlag GmbH Apr 2013, 2013. Buch. Book Condition: Neu. 246x162x17 mm. Neuware - This book presents the most important and crucial problems of space automation in context of future exploration programs. These programs could involve such issues as space situational awareness program, planetary protection, exploitation of minerals, assembly, manufacturing, and search for new habitable location for next human generations. The future exploration of Space and related activities will involve robots. In particular, new autonomous robots need to be developed with high degree of intelligence. Such robots would make space exploration possible but also they would make space automation an important factor in variety of activities related to Space. 171 pp. Englisch.

Reviews

It is one of my personal favorite books. Sure, it is engaging, continues to be an amazing and interesting literature. I am quickly able to possibly get a enjoyment of looking at a published book.

-- **Wellington Rosenbaum**

A must buy book if you need to add benefit. It can be really exciting through reading time. I am pleased to let you know that this is the greatest publication we have read through during my very own life and may be the best publication for possibly.
