Createspace. Paperback. Condition: New. This item is printed on demand. 106 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. This is the answer key of the twelfth volume of the entire set of 12 volumes of word problems solving strategies. If you want to set a solid foundation in math, grasping the techniques on solve word problems is the key to it. This set of books teach you the techniques and strategies you will need to solve word problems. Sample question: 93. Peter has read 120 pages of a book that he has just borrowed from the library. If the number of pages he has read is 25 less than the number of pages he has not read yet, how many pages does the book have Reasoning and solution: From the number of pages he has read is 25 less than the number of pages he has not read yet, we know that the number of pages he has not read yet (the noun phrase after the word than) is the amount in 1 whole and the number of pages he has read is in a fractional part that is 25 less than the fractional part the number of pages he has not read yet is in, 1, so the number of pages he has read is in a fractional part that is 25 less than 1 or is $(1-25)$ or is 35 of 1 whole. He has read 120 pages so we divide 35 into the amount in it, 120, to find the amount in 1 whole, the number of pages he has not read yet: $120 \div 35 = 3 \frac{2}{7}$ 200 pages The number of pages that he has not read is 200 pages. . . . The techniques and strategies on using algebraic equations to solve word problems...
