

Extreme Stars: At the Edge of Creation

Filesize: 1.24 MB

Reviews

This pdf may be really worth a read, and superior to other. It generally does not price too much. Once you begin to read the book, it is extremely difficult to leave it before concluding.

(Dylan Schaden)

EXTREME STARS: AT THE EDGE OF CREATION

[DOWNLOAD](#)

Cambridge University Press. Paperback. Book Condition: New. Paperback. 258 pages. Dimensions: 9.6in. x 6.7in. x 0.6in. Over the past 200 years, our knowledge of stars has expanded enormously. From seeing myriad dots of different brightnesses, we have moved on to measure their distances, temperatures, sizes, chemical compositions, and even ages, finding both young and ancient stars that dwarf our Sun and are dwarfed by it. Unique in its approach, *Extreme Stars* describes the lives of stars from a new perspective by examining their amazing features. The result is a refreshing, up-to-date, and engaging overview of stellar evolution, suitable for everyone interested in viewing or studying the stars. Ten chapters, generously illustrated throughout, explain the natures of the brightest, the largest, the hottest, and the youngest, among other kinds of stars, ending with a selection of the strangest stars the Universe has to offer. *Extreme Stars* shows how stars develop and die and how each extreme turns into another under the inexorable twin forces of time and gravity. James B. Kaler is Professor of Astronomy at the University of Illinois, Champaign-Urbana. He has held Fulbright and Guggenheim Fellowships, has been awarded medals for his work from the University of Liege in Belgium and the University of Mexico, and most recently was selected to give the Armand Spitz lecture by the Great Lakes Planetarium Association. His research area, in which he has published over 100 papers, involves dying stars. Kaler has also written for a variety of popular magazines, including *Astronomy*, *Sky and Telescope*, and *Scientific American*. His previous books include *The Ever-Changing Sky* (Cambridge, 1996), *Stars and their Spectra* (Cambridge, 1997), *Cosmic Clouds* (Scientific American Library Paperback, 1998), and *The Little Book of Stars* (Copernicus, 2000). He is a current member of the Board of Directors of the Astronomical Society of the...
