RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 84 pages. OCLC Number: (OCoLC)303579401 Subject: Biodegradation -- Analysis -- Handbooks, manuals, etc. Excerpt: . . . 1. 0 Introduction The atoms of a particular element must have the representative of the environmental medium being same number of protons and electrons, but they sampled. Other regulatory agencies world-wide can have different numbers of neutrons. When have similar expectations. Because CSIA is a new atoms differ only in the number of neutrons, they approach in environmental investigations, there are referred to as isotopes of each other. If a par-no widely accepted standards for accuracy, preci-ticular isotope is not radioactive, it is called a sion and sensitivity, and no established approaches stable isotope. Because they differ in the number to document accuracy, precision, sensitivity and of neutrons, isotopes differ in mass, and they can representativeness. be separated using a mass spectrometer. In recent This Guide is intended for managers of hazardous years mass spectrometers have been joined to gas waste sites who must design sampling plans that chromatographs to allow separation of individual will include CSIA and specify data quality objec-organic compounds in a mixture, followed by tives for..
