Excerpt: . . . Chapter 2 2 Background Recent integrity management reviews have identified difficulties in assessing the mechanical damage threat to pipeline integrity. The pipeline industry, as well as organizations such as the Common Ground Alliance (CGA), has made a significant effort to increase public awareness of the risks of excavation in pipeline corridors. The pipeline industry has also supported research for the prevention of mechanical damage, detection using in-line inspection (ILI) and other technologies, characterization of damage, and evaluation of severity, as well as the mitigation of existing damage. Pipeline companies consider all of these preventative and mitigative factors in combination to manage mechanical damage threat. 2. 1 Problem Statement Federal regulations require pipeline operators to identify and address integrity threats applicable to their own pipeline systems. In nearly all cases, mechanical damage is a threat that must be addressed. Pipeline companies and their regulators must determine if the...
